04/07/2026 Initial Specifications & Technology Setup

Today, I set up the Cadence environment and reviewed the target specifications for the PMOS LDO.

- **Target V_{out}:** 1.2 V
- **Max Load Current (I_{load}):** 50 mA
- **Dropout Voltage:** 200 mV

I will begin sizing the PMOS pass transistor tomorrow based on the minimum dropout voltage requirement.

05/07/2026 Pass Transistor Sizing & Greek Test
